Memorandum

Date: May 15, 2020

To: Cassie Cuaresma, Southern California Edison (SCE); Henry Liu, Pacific Gas and Electric (PG&E); Chan Paek, Southern California Gas (SCG); Ed Reynoso, San Diego Gas and Electric (SDG&E)

CC:

From: Peter Biermayer - Utilities Engineer, Industrial/ Agricultural Programs and Portfolio Forecasting Section, Energy Efficiency Branch, Energy Division, CPUC

Subject: Disposition Approving Residential Cooking Appliances – Fuel Substitution: **SWAP013-01**

---

## 1. Discussion and Direction

The California Public Utilities Commission (CPUC) approves the statewide workpaper for Residential Cooking Appliances – Fuel Substitution: SWAP013-01. This workpaper is a new Phase 2 workpaper submission. The workpaper is effective on May 15, 2020.

## 2. Workpaper Summary

This fuel substitution workpaper is for the installation of residential electric cooking appliances replacing existing natural gas appliances. This workpaper supports oven, cooktop, and ranges measures. This workpaper meets all fuel substitution guidance document requirements.

## 3. Critical Review Issues

Fuel substitution measures may face market barriers and Program Administrators (PAs) may choose to offer rebates which are greater than the incremental measure cost (IMC), meaning incentives may be greater than the difference between the fuel substitution technology measure cost and the baseline measure cost, in order to promote the new measures and overcome those barriers.
